JUNIOR WEB DEVELOPER • REACT & NODE.JS

Quentin Martens

🌐 martensq.github.io/portfolio | ✉ quentin.martens@orange.fr | 📞 0633474960

PROFILE

Junior web developer focused on React and Node.js, with experience building and deploying real-world applications.

Comfortable working across the full stack, from UI design to REST APIs and databases.

I enjoy writing clean, maintainable code and building user-focused products with solid UX.

EXPERIENCE

PERSONAL PROJECTS • REACT & NODE.JS

- GameVault • Fullstack application with React, Node.js, Prisma and PostgreSQL (JWT authentication)
- Job Tracker • Kanban-style app with CRUD, LocalStorage and JSON export/import
- Project Brief Wizard • Multi-step form with validation, LocalStorage and export features

Additional projects and live demos available on my portfolio.

WEB DEVELOPER INTERN • SYMFONY
CORNING | 2024

Internal business application (internship project)

- Built an internal web application to manage IT and mobile equipment assigned to employees
- Developed features to track stock, assignments, and availability of hardware
- Designed and maintained the relational database schema using Doctrine and MySQL
- Worked on real-world backend logic, data consistency, and internal tooling needs

EDUCATION

WEB DEVELOPER TRAINING
NEXTFORMATION | 2024

- JavaScript, React, Node.js, databases, MVC concepts
- Practical projects and real-world use cases
